Career Profile

Cybersecurity Enthusiast | Motivated Cybersecurity graduate with hands-on exposure to Linux environments, network testing, and privacy tools. Currently building skills in penetration testing through self-directed projects and home labs. Currently learning: API security fundamentals, Burp-suite, Python, Metasploit. Recently i completed a certification with isc2 cc and aiming to write security+ Eager to contribute to a forward-thinking IT team and grow into a Technical security role.

Personal Mission & Values

Anchored by values of God, Family, and Peace. Committed to building a meaningful career through tech, learning, and service. Actively expanding real-world readiness through home lab environments and hands-on projects — ready to bring enthusiasm, growth, and discipline into a forward-looking IT environment.

Personal Information

Date of Birth:	22nd February, 2000
Place of Birth:	Onitsha, Anambra State
Place of Origin:	Abagana, Anambra State
Sex:	Male
Languages:	English and Igbo
Religion:	Christianity
Marital Status:	Single
Area of Specialization:	Cyber Security

Technical Skills

- Virtual machines setup and utilization
- Linux Environments (Kali Linux)
- Penetration Testing (API testing and analysis)
- Currently learning: Network Security; BurpSuite; C++; Metasploit, API Penetration testing
- Python (Basic scripting & automation)
- Research, Documentation & Communication

Professional Certifications

1. certified Cybersecurity
2. CompTIA Security+ (in view)

Summary of Qualification

- 2021 – 2024: B.Sc Cyber Security (2nd Class Upper Division) – Admiralty University of Nigeria, Ibusa
- 2012 – 2018: Senior Secondary Certificate – Federal Science and Technical College, Awka
- 2006 – 2012: First School Leaving Certificate – St. Marks Primary School, Onitsha

Working Experience and Achievements

Founder & Business Owner

Takeaway Express – Ibusa, Asaba, Ogwashi-Uku (2023 – Present)

- Launched and operate a last-mile delivery business for food, groceries, and pharmaceuticals.
- Managed logistics, vendor onboarding, and customer support via WhatsApp automation.
- Built structured workflows and applied leadership, budgeting, and operational discipline.

IT Intern – Industrial Training

Obit Brothers Communication (OBC), 2023

- Assisted with physical and logical network infrastructure testing and monitoring.
- Gained experience in Linux system operations, workstation troubleshooting, and hardware setup.
- Developed foundational skills in system security, IT support, and real-world documentation.

Projects

Tor-Based Proxy Chain – Anonymity Tool (Personal Project, 2023)

- Configured a proxy chain using the Tor network on Linux to anonymize traffic.
- Demonstrated knowledge of tunneling, routing, and network obfuscation.
- Explored tools like proxychains, Tor browser, and terminal-based configuration.

- **web app testing for vulnerabilities**

Like performing basic SSRF vulnerability scan and mitigation with the help of portswiggers learning platform

- **VM PROJECTS**

Setting up virtual machines on local machine and also managing permissions and access control
Implementing DAC, MAC, RUBAC RBAC.

Referees

1. Prof. Mbeledeogu Njide – Head, Computer Science Department, Nnamdi Azikiwe University, Awka, Anambra State. 08036686032
2. Prof. Odachi Gabriel – Dean, Faculty of Science, Sports University of Nigeria, Delta State. 07060445858
3. Prof. Ejiofor Virginia – Computer Science Department, Nnamdi Azikiwe University, Awka, Anambra state, 08035611654 .
