Professional Summary

Motivated Cybersecurity graduate with practical experience in Linux environments, network security, and web application testing. Proficient in Kali Linux, virtual machines, and security tools through hands-on projects and internships. Recently earned ISC2 Certified in Cybersecurity (CC) and currently preparing for CompTIA Security+. Seeking an entry-level Cybersecurity role to apply technical skills in a dynamic environment.

Technical Skills

- **Security Tools:** Kali Linux, Burp Suite, ProxyChains, Tor Network, Metasploit (fundamentals)
- **Penetration Testing:** API testing, SSRF vulnerability identification & mitigation, Web application testing
- **Virtualization & Systems:** Virtual Machines, Access Control Models (DAC, MAC, RBAC)
- **Programming & Scripting:** Python (Basic scripting & automation)
- **Networking:** Network monitoring, proxy configuration, infrastructure troubleshooting
- **Others:** Technical documentation, research, Linux system administration

Professional Certifications

- **ISC2 Certified in Cybersecurity (CC)** – 2026
- **CompTIA Security+** (In Progress)

Education

B.Sc. Cybersecurity – Second Class Upper Division

Admiralty University of Nigeria, Ibusa, Delta State

2021 – 2024

Senior Secondary Certificate

Federal Science and Technical College, Awka

2012 – 2018

Professional Experience

Cybersecurity Intern

ActiveEdge Technologies — Lagos, Nigeria

Dates: Oct 2025 – Present

- Gained hands-on experience in cybersecurity operations and security monitoring
- Assisted with vulnerability assessment and penetration testing activities
- Supported the team in implementing security controls and best practices
- Participated in security audits and documentation of findings

Founder & Business Owner

Takeaway Express (Delta State)

2023 – Present

- Founded and manage a last-mile delivery service serving food, groceries, and pharmaceutical clients.
- Designed operational workflows, managed logistics, and handled customer support using automated systems.
- Demonstrated leadership, budgeting, and problem-solving skills.

IT Intern

Obit Brothers Communication (OBC)

2023

- Supported network infrastructure setup, monitoring, and troubleshooting.
- Gained practical exposure to Linux system operations and workstation configuration.
- Assisted in implementing basic security practices.

Projects

Tor-Based Anonymity Proxy Chain (Personal Project, 2023)

- Designed and configured a multi-hop proxy chain using Tor Network on Kali Linux.
- Demonstrated understanding of network routing, tunneling, and traffic obfuscation.

Web Application Vulnerability Testing

- Conducted security testing using PortSwigger Web Academy.

- Identified and mitigated Server-Side Request Forgery (SSRF) vulnerabilities.

Virtual Machine Security Laboratory

- Built and secured multiple virtual machines with different access control models (DAC, MAC, RBAC).

Additional Information

- **Languages:** English (Fluent), Igbo (Native)
